WooliesX QA Code Challenge

Setup a new repo/project with all the libraries you needed to set a **BDD** testing framework [No language restriction].

Once you are complete please upload the code to GitHub and share it with us for review. Use best practices to write code, which you follow in your day-to-day development [If any major enhancement is possible please put it as a comment].

Any assumptions you might have made or constraints or uncertainties. Questions you may have around the integrity/validity of this data.

#1 UI Automation Challange

Your Task:

1. **Go To URL: http://automationpractice.com/index.php**
2. Navigate to Dresses Menu and click Summer Dress
3. Add 2 dress to the cart
4. Complete the purchase

Acceptance Criteria: *Please write/code the above tasks in the BDD format.*

Note: Please write 'how to execute code' in the readme file.
